

Macmillan Examinations.

Students from Grade 3 to IGCSE appeared for University of New South Wales Assessment tests.

On an average there were 75 students in each subject: English, Science, Mathematics and Computer Skills. The results for the same will be declared in November.

Aptitude Tests.

IGCSE students underwent an Aptitude Test conducted by Growth Career Centre. The results are expected in a week's time. The parents along with the ward will meet the counselors for next round of interviews.

“Teen Talk”

The school counselor has started a series of talks with the children from grade 7 upwards aptly named Teen Talk. These sessions will be held fortnightly and will focus on different issues facing our teens in today's world. First session was held on Tuesday 23rd Aug. The sessions are being held separately for boys and girls.

Our teens have a lot in their minds ranging from parental expectations, their own expectations, how the world views them and also how they view themselves. They need to be aware of their strengths, weakness, how to express anger constructively, how to deal with daily frustrations and most importantly to accept themselves as worthy individuals who can make a difference to this world in a positive way. With today's changing world and daily changes in our surrounding environment we also need to have a good communication channel with our children so that there is an atmosphere of open discussion, acceptance and understanding. Teen Talk aims to have a continuous dialogue with the teens towards creating an open atmosphere with better understanding and caring towards self and others.

Visit to Nehru Science Centre

Students of Grade 5 upwards visited Nehru Science Centre on Saturday 27th Aug 2011. They could enjoy The Science Odyssey, a 3D movie and visits to science galleries. Due to heavy rains they had to cut short a part of the programme.

UOI Workshop

Dr. Swati Sawant had organised a UOI workshop for the parents. The interactive sessions included students of the respective classes explaining the components of the units they dealt with for the UOI..

Happenings in Preschool

Here's a colour,
There's a colour,
Colours everywhere.
Red and yellow mixed together
Gives an orange to share!
Wow! A new colour! Yes, of course. Transition 1 had a story session about a little boy wanting to paint a carrot picture. He surely knew that carrots are orange but didn't know how he could get this colour. His mother helps him by mixing red and yellow. Delighted, the little boy screams---Orange! That's the colour I want.

Inspired by the story our little hands experimented and discovered a new colour by mixing two colours. A Super Science experience!
Who's next? Its our T2 children building numerical connections. They mastered their gross motor skills too by throwing and catching a ball of yarn not missing the sequence of numbers. 1 to 2 and 2 to 3, across the circle the yarn flew..... making a web. A well knit web that could put a spider to shame! A fun-tastic game enjoyed by our students!

Preparations for our much awaited concert have begun. Preschoolers have set the ball rolling with their practice sessions. Watch out.....there's lots more in store.

**Its fun Friday once again-a day for outdoor play.T1 and T2 had a rollicking time.
It was time for sack race,
Fast and slow at their own pace,
They jumped around with a smiling face.**

Forth coming events

30th August: 4 students from grade 9 will participate in Interschool quiz contest organised by Nehru Science Centre.

2nd September: CIE workshop at 4.30 p.m in the school auditorium.

3rd Sept: Teachers' Picnic.
